March 06, 2020

Invitation for Bid GSA-009-20

❖ Received from Pacific Data Systems on 02/24/2020

1 Question: Reference Item 1.1,

Please identify the existing configurations and network switches that the awarded vendor will be tasked to migrate.

Response from OTECH:

The current backbone switch model is brocade Netiron CER with configurations including VLAN, OSPF, MPLS, VPLS, and Virtual interfaces.

2 Question: [Reference Item 1.1]

What enhancements are being requested of the existing configurations?

Response from OTECH:

The backbone equipment is intended to be upgraded for growth as well as best practice and security compliance.

3 Question:

PDS requests site surveys of the locations where the equipment is to be installed in order to evaluate any issues related to site preparation and equipment configuration needed to support each site.

Response from OTECH:

? PENDING RESPONSE FROM OTECH

4 Question:

A delivery of 30 days after receipt of order is unrealistic and anti-competitive. This requirement runs counter to obligations on the part of the Government for planned procurements and creating a competitive procurement environment for the products specified. These are highly specialized products that are not available "off the shelf" and involve a more complex logistical process. For these reasons, PDS recommends a delivery requirement of 120 days but not less than 90 days.

Response from OTECH:

A delivery time frame of 60 days will be allowable. Please see Amendment 1.

DAVID M. CRUZ

Asst. Chief Procurement Officer
